## PERSONAL STATEMENT

I am a fourth-year student of Computer Games Development in the University of Limerick. I am proficient in software development and many different programming languages. I have a general interest in computers and software and have experience in the field of IT and Software Development. I am looking for a graduate position in a relevant environment in computer science. I am flexible for hours.

---

## WORK HISTORY

Office Assistant	March 2015/April 2016
Shannsoft Computer Networks	

Assisted in an office that offered IT assistance to multiple companies. This included remote troubleshooting and fixing clients work computers. I was also tasked with replacing the hard drives of laptops with more modern and faster solid-state drives. Other duties included organisation of official office files and invoices, tidying of the workplace and management of the shared office warehouse.

Content Reviewer	July 2018 – January 2019
Code Institute	

While working at Code institute I tested Code for their new Full Stack Web Developer Course, one of the many courses Code Institute offered. I would follow their course as if I were one of their students to ensure it was clear and easy to learn from. I had daily web meetings with the developers to give criticism and fill them in on our work for the day. I learned quite a lot of relevant skills for software development, including the use GitHub and slack for simultaneous work with my co-workers.

Assistant Coding Instructor	January 2019
University of Limerick ICT	

I worked in the CSIS department learning centre and helped teach a small 2-day introduction to programming course to TY students. Provided a fun learning environment, guided the students and helped when they had difficulty or questions with the course offered.

## EDUCATION

BSc in Computer Games Development	September 2017 – May 2021
University of Limerick, Castletroy, Limerick	

## SKILLS

**Software Development** – Java, SQL, C, C++, C#, Go, Javascript, HTML/CSS.

**Information Technology** – Having worked multiple IT jobs and a general interest in computers.

**Attention to detail** – Having been responsible for deep cleans in student apartments, there was many detail-oriented cleanings.
